Printed in Great Britain

Contents for Volume 130

Number 1, 7 January 1988

PEASE, C. M., Biases in the Total Extinction Rates of Fossil Taxa . . 1

PEASE, C. M., Biases in the Per-taxon Origination and Extinction Rates of Fossil Taxa 9

PEASE, C. M., Biases in the Survivorship Curves of Fossil Taxa . . 31

ISHIDA, T., HORIIKE, K., TOJO, H. and NOZAKI, M., Interaction of Protein with a Self-Associating Ligand. Deviation from a Hyperbolic Binding Curve and the Appearance of Apparent Co-operativity in the Scatchard Plot 49

TOKIMOTO, T. and SHIRANE, K., A Self-Organized Chemical Model and Reaction Cascade 67

FIDELMAN, M. L. and MIKULECKY, D. C., Network Thermodynamic Analysis and Simulation of Isotonic Solute-Coupled Volume Flow in Leaky Epithelia: An Example of the Use of Network Theory to Provide the Qualitative Aspects of a Complex System and its Verification by Simulation 73

EILBERT, J. L., Axon Shape as a Basis for Multinode Functional Units in a Hierarchical Neural Model 95

LETTERS TO THE EDITOR

DUGGLEBY, R. G., Fitting the Double Michaelis–Menten Equation to Kinetic Data 123

CORNISH-BOWDEN, A., Saturation Functions as a Nested Set . . 125

ANNOUNCEMENT 127

Number 2, 21 January 1988

KOBUCHI, Y., ITO, T. and OGIWARA, A., A Model for Rouleaux Pattern Formation of Red Blood Cells 129

CRESSMAN, R., Frequency-dependent Viability Selection (A Single-Locus, Multi-Phenotype Model) 147

CRESSMAN, R., Complex Dynamical Behaviour of Frequency-dependent Viability Selection: An Example 167

HSU, J-P. and TSENG, S., Kinetic Analysis of Mating Behavior in Flies: A Transition Stage Model 175

Bonifazzi, C., Belluzzi, O. and Sacchi, O., Kinetic Analysis of Incomplete Current Tracings According to the Hodgkin–Huxley Model . . 183

Charlesworth, B., The Evolution of Mate Choice in a Fluctuating Environment 191

Gattuso, J-P. and Jaubert, J., Computation of Metabolic Quotients in Plant–Animal Symbiotic Units 205

Aspden, R. M., The Theory of Fibre-Reinforced Composite Materials Applied to Changes in the Mechanical Properties of the Cervix During Pregnancy 213

Shirane, K. and Tokimoto, T., Network Formation in Negative Charged Membranes by Two Divalent Cations and the Catastrophe . . 223

Engen, S. and Sæther, B-E., Optimalization of Constrained Life Histories: Some Generalizations 229

Letters to the Editor

Ji, S., Watson–Crick and Prigoginian Forms of Genetic Information 239

Maynard Smith, J., Can a Mixed Strategy be Stable in a Finite Population? 247

Snyder, D. M., On the Time of a Conscious Peripheral Sensation . 253

Number 3, 7 February 1988

Kirkwood, T. B. L. and Burdett, I. D. J., Estimating the Growth Pattern of Micro-organisms in Distinct Stages of the Cell Cycle . . . 255

Omholt, S. W., Relationships Between Worker Longevity and the Intracolonial Population Dynamics of the Honeybee 275

Turvey, M. T., Schmidt, R. C., Rosenblum, L. D. and Kugler, P. N., On the Time Allometry of Co-ordinated Rhythmic Movements . . 285

Aida, M., An Ab Initio Molecular Orbital Study on the Sequence-dependency of DNA Conformation: An Evaluation of Intra- and Inter-Strand Stacking Interaction Energy 327

Tözeren, A. and Skalak, R., Interaction of Stress and Growth in a Fibrous Tissue 337

Luo, L. F., Tsai, L. and Zhou, Y. M., Informational Parameters of Nucleic Acid and Molecular Evolution 351

Taylor, P. D., An Inclusive Fitness Model for Dispersal of Offspring . 363

Number 4, 21 February 1988

FIALKOWSKI, K. R., Lottery of Sympatric Speciation—A Computer Model 379

LUMSDEN, C. J., Gene-Culture Coevolution: A Test of the Steady-State Hypothesis for Gene-Culture Translation 391

WELCH, G. R., KELETI, T. AND VÉRTESSY, B., The Control of Cell Metabolism for Homogeneous vs. Heterogeneous Enzyme Systems . . . 407

POLOZOV, R. V. AND YAKUSHEVICH, L. V., Nonlinear Waves in DNA and Regulation of Transcription 423

RUPPERSBERG, J. P. AND RÜDEL, R., The Effects of Space Charge on the Ionic Currents Through Biological Membranes 431

JOLLIFFE, P. A., Evaluating the Effects of Competitive Interference on Plant Performance 447

KLEIN, P. AND SOMORJAI, R. L., Nonlinear Methods for Discrimination and Their Application to Classification of Protein Structures . . . 461

SANFORD, J. C., Applying the PDR Principle to AIDS 469

WITTRUP, K. D. AND BAILEY, J. E., A Mathematical Model of Recombinational Amplification of the 2μ Plasmid in the Yeast *Saccharomyces cerevisiae* 481

HARRISON, L. G. AND KOLÁŘ, M., Coupling Between Reaction-Diffusion Prepattern and Expressed Morphogenesis, Applied to Desmids and Dasyclads 493

Index to Volume 129

AIDA, M., An ab initio molecular orbital study on the sequence-dependency of DNA conformation: an evaluation of intra- and inter-strand stacking interaction energy, 327
AIDS, applying the PDR principle to, 469
Allometry, time, of co-ordinated rhythmic movements, 285
Amplification, recombinational, of the 2μ plasmid in the yeast *Saccharomyces cerevisiae*, a mathematical model of, 481
Animal–plant symbiotic units, computation of metabolic quotients, 205
ASPDEN, R. M., The theory of fibre-reinforced composite materials applied to changes in the mechanical properties of the cervix during pregnancy, 213
Axon shape as a basis for multinode functional units in a hierarchical neural model, 95

BAILEY, J. E. (see WITTRUP, K. D.), 481
Behavior, mating, in flies, kinetic analysis; a transition stage model, 175
BELLUZZI, O. (see BONIFAZZI, C.), 183
BONIFAZZI, C., BELLUZZI, O. and SACCHI, O., Kinetic analysis of incomplete current tracings according to the Hodgkin–Huxley model, 183
BURDETT, I. D. J. (see KIRKWOOD, T. B. L.), 255

Catastrophe, network formation in negative charged membranes by two covalent cations and, 223
Cations, divalent, two, network formation in negative charged membranes by, and the catastrophe, 223
Cell cycle, estimating the growth pattern of micro-organisms in distinct stages of, 255
Cell metabolism control for homogeneous vs. heterogeneous enzyme systems, 407
Cells, red blood, a model for rouleaux pattern formation of, 129
Cervix during pregnancy, the theory of fibre-reinforced composite materials applied to changes in the mechanical properties of, 213
CHARLESWORTH, B., The evolution of mate choice in a fluctuating environment, 191
Chemical model, self-organized, and reaction cascade, 67
Choice of mate in a fluctuating environment, the evolution of, 191
Classification of protein structures, nonlinear methods for discrimination and their application to, 461
Coevolution, gene–culture: a test of the steady-state hypothesis for gene–culture translation, 391
Competitive interference, evaluating effects on plant performance, 447
Conformation of DNA, an ab initio molecular orbital study on the sequence-dependency of; evaluation of intra- and inter-strand stacking interaction energy, 327
Conscious peripheral sensation, on the time of (letter), 253
Co-ordinated rhythmic movements, on the time allometry of, 285
CORNISH-BOWDEN, A., Saturation functions as a nested set (letter), 125
Coupling between reaction-diffusion prepattern and expressed morphogenesis, applied to desmids and dasyclads, 491
CRESSMAN, R., Complex dynamical behaviour of frequency-dependent viability selection: an example, 167
CRESSMAN, R., Frequency-dependent viability selection (a single-locus, multi-phenotype model), 147
Currents, ionic, through biological membranes, the effects of space charge on, 431

Current tracings, incomplete, kinetic analysis of, according to the Hodgkin–Huxley model, 183
Cycle, cell, estimating the growth pattern of micro-organisms in distinct stages of, 255

Dasyclads and desmids, application of coupling between reaction–diffusion prepattern and expressed morphogenesis, 493
Desmids and dasyclads, application of coupling between reaction–diffusion prepattern and expressed morphogenesis, 493
Discrimination, nonlinear methods for, and their application to classification of protein structures, 461
DNA conformation, an ab initio molecular orbital study on the sequence-dependency of; evaluation of intra- and inter-strand stacking interaction energy, 327
DNA, nonlinear waves in, and regulation of transcription, 423
DUGGLEBY, R. G., Fitting the double Michaelis–Menten equation to kinetic data (letter), 123
Dynamical behaviour of frequency-dependent viability selection: an example, 167
Dynamics, population, intracolonial, of the honeybee, relationships between worker longevity and, 275

EILBERT, J. L., Axon shape as a basis for multinode functional units in a hierarchical neural model, 95
ENGEN, S. and SÆTHER, B-E., Optimalization of constrained life histories: some generalizations, 229
Environment, fluctuating, the evolution of mate choice in, 191
Enzyme systems, homogeneous vs. heterogeneous, the control of cell metabolism for, 407
Epithelia, leaky, network thermodynamic analysis and simulation of isotonic solute-coupled volume flow in, 73
Evolution of mate choice in a fluctuating environment, 191
Evolution, molecular, informational parameters of nucleic acid and, 351
Extinction rates of fossil taxa, biases in, 1
Extinction rates of fossil taxa, biases in the per-taxon origination and, 9

FIALKOWSKI, K. R., Lottery of sympatric speciation—a computer model, 379
Fibre-reinforced composite materials theory, application to changes in the mechanical properties of the cervix during pregnancy, 213
Fibrous tissue, interaction of stress and growth in, 337
FIDELMAN, M. L. and MIKULECKY, D. C., Network thermodynamic analysis and simulation of isotonic solute-coupled volume flow in leaky epithelia: an example of the use of network theory to provide the qualitative aspects of a complex system and its verification by simulation, 73
Fitness model for dispersal of offspring, 363
Flies, kinetic analysis of mating behavior; a transition stage model, 175
Fossil taxa, biases in the per-taxon origination and extinction rates of, 9
Fossil taxa, biases in the survivorship curves of, 31
Fossil taxa, biases in the total extinction rates of, 1
Frequency-dependent viability selection, complex dynamical behaviour; an example, 167
Frequency-dependent viability selection (a single-locus, multi-phenotype model), 147

GATTUSO, J-P. and JAUBERT, J., Computation of metabolic quotients in plant–animal symbiotic units, 205
Gene–culture coevolution: a test of the steady-state hypothesis for gene–culture translation, 391
Genetic information, Watson–Crick and prigoginian forms of (letter), 239
Growth pattern of micro-organisms in distinct stages of the cell cycle, estimation of, 255
Growth and stress interaction in a fibrous tissue, 337

HARRISON, L. G. and KOLÁŘ, M., Coupling between reaction-diffusion prepattern and expressed morphogenesis, applied to desmids and dasyclads, 493
Hierarchical neural model, axon shape as a basis for multinode functional units in, 95
Hodgkin-Huxley model, kinetic analysis of incomplete current tracings according to the, 183
Honeybee, relationships between worker longevity and the intracolonial population dynamics, of, 275
HORIIKE, K. (see ISHIDA, T.), 49
HSU, J-P. and TSENG, S., Kinetic analysis of mating behavior in flies: a transition stage model, 175

Information, genetic, Watson-Crick and prigoginian forms of (letter), 239
Informational parameters of nucleic acid and molecular evolution, 351
Ionic currents through biological membranes, the effects of space charge on, 431
ISHIDA, T., HORIIKE, K., TOJO, H. and NOZAKI, M., Interaction of protein with a self-associating ligand. Deviation from a hyperbolic binding curve and the appearance of apparent co-operativity in the Scatchard plot, 49
Isotonic solute-coupled volume flow in leaky epithelia, network thermodynamic analysis and simulation of, 73
ITO, T. (see KOBUCHI, Y.), 129

JAUBERT, J. (see GATTUSO, J-P.), 205
JI, S., Watson-Crick and prigoginian forms of genetic information (letter), 239
JOLLIFFE, P. A., Evaluating the effects of competitive interference on plant performance, 447

KELETI, T. (see WELCH, G. R.), 407
Kinetic analysis of incomplete current tracings according to the Hodgkin-Huxley model, 183
Kinetic analysis of mating behaviour in flies; a transition stage model, 175
Kinetic data, fitting the double Michaelis-Menten equation to (letter), 123
KIRKWOOD, T. B. L. and BURDETT, I. D. J., Estimating the growth pattern of micro-organisms in distinct stages of the cell cycle, 255
KLEIN, P. and SOMORJAI, R. L., Nonlinear methods for discrimination and their application to classification of protein structures, 461
KOBUCHI, Y., ITO, T. and OGIWARA, A., A model for rouleux pattern formation of red blood cells, 129
KOLÁŘ, M. (see HARRISON, L. G.), 493
KUGLER, P. N. (see TURVEY, M. T.), 285

Life histories, constrained, optimalization of; some generalizations, 229
Ligand, self-associating, interaction of protein with; deviation from a hyperbolic curve and apparent co-operativity in the Scatchard plot, 49
Longevity, worker, and relationships to the intracolonial population dynamics of the honey-bee, 275
Lottery of sympatric speciation; a computer model, 379
LUMSDEN, C. J., Gene-culture coevolution: a test of the steady-state hypothesis for gene-culture translation, 391
LUO, L. F., TSAI, L. and ZHOU, Y. M., Informational parameters of nucleic acid and molecular evolution, 351

Mate choice in a fluctuating environment, the evolution of, 191
Mating behavior in flies, kinetic analysis; a transition stage model, 175
Materials, composite, fibre-reinforced, application of the theory to changes in the mechanical properties of the cervix during pregnancy, 213
MAYNARD SMITH, J., Can a mixed strategy be stable in a finite population? (letter), 247
Membranes, biological, the effects of space charge on the ionic currents through, 431

Membranes, charged, negative, network formation in, by two covalent cations and the catastrophe, 223
Metabolic quotients in plant–animal symbiotic units, computation of, 205
Metabolism, cell, control for homogeneous vs. heterogeneous enzyme systems, 407
Michaelis–Menten double equation, fitting to kinetic data (letter), 123
Micro-organisms, estimating the growth pattern of, in distinct stages of the cell cycle, 255
MIKULECKY, D. C. (see FIDELMAN, M. L.), 73
Molecular evolution, informational parameters of nucleic acid and, 351
Molecular orbital study on the sequence-dependency of DNA conformation: an evaluation of intra- and inter-strand stacking interaction energy, 327
Morphogenesis, expressed, coupling between reaction–diffusion prepattern and; application to desmids and dasyclads, 493
Movements, rhythmic, co-ordinated, on the time allometry of, 285
Multinode functional units in a hierarchical neural model, axon shape as a basis for, 95

Nested set, saturation functions as a (letter), 125
Network formation in negative charged membranes by two divalent cations and the catastrophe, 223
Network thermodynamic analysis and simulation of isotonic solute-coupled volume flow in leaky epithelia, 73
Neural hierarchical model, axon shape as a basis for multinode functional units in, 95
NOZAKI, M. (see ISHIDA, T.), 49
Nucleic acid and molecular evolution, informational parameters of, 351

Offspring, an inclusive model for dispersal of, 363
OGIWARA, A. (see KOBUCHI, Y.), 129
OMHOLT, S. W., Relationships between worker longevity and the intracolonial population dynamics of the honeybee, 275
Optimalization of constrained life histories; some generalizations, 229
Origination, per-taxon, and extinction rates of fossil taxa, biases in, 9

Pattern formation, rouleaux, of red blood cells, a model for, 129
Pattern of growth of micro-organisms in distinct stages of the cell cycle, estimation of, 255
PDR principle applied to AIDS, 469
PEASE, C. M., Biases in the per-taxon origination and extinction rates of fossil taxa, 9
PEASE, C. M., Biases in the survivorship curves of fossil taxa, 31
PEASE, C. M., Biases in the total extinction rates of fossil taxa, 1
Per-taxon origination and extinction rates of fossil taxa, 9
Plant performance, evaluating the effects of competitive interference on, 447
Plant-animal symbiotic units, computation of metabolic quotients in, 205
Plasmid, 2μ, a mathematical model of recombinational amplification in the yeast *Saccharomyces cerevisiae*, 481
POLOZOV, R. V. and YAKUSHEVICH, L. V., Nonlinear waves in DNA and regulation of transcription, 423
Population dynamics, intracolonial, of the honeybee, relationships between worker longevity and, 275
Population, finite, can a mixed strategy be stable in? (letter), 247
Pregnancy, the theory of fibre-reinforced composite materials applied to changes in the mechanical properties of the cervix during, 213
Prigoginian and Watson–Crick forms of genetic information (letter), 239
Protein interaction with a self-associating ligand; deviation from a hyperbolic binding curve, and apparent co-operativity in the Scatchard plot, 49
Protein structures, nonlinear methods for discrimination and their application to classification of, 461

Reaction cascade, a self-organized chemical model and, 67
Reaction-diffusion prepattern and expressed morphogenesis, coupling between; application to desmids and dasyclads, 493
Recombinational amplification of the 2μ plasmid in the yeast *Saccharomyces cerevisiae*, a mathematical model of, 481
Red blood cells, a model for rouleaux pattern formation of, 129
Regulation of transcription, and nonlinear waves in DNA, 423
Rhythmic co-ordinated movements, on the time allometry of, 285
ROSENBLUM, L. D. (see TURVEY, M. T.), 285
Rouleaux pattern formation of red blood cells, a model, 129
RÜDEL, R. (see RUPPERSBERG, J. P.), 431
RUPPERSBERG, J. P. and RÜDEL, R., The effects of space charge on the ionic currents through biological membranes, 431

SÆTHER, B-E. (see ENGEN, S.), 229
Saccharomyces cerevisiae, a mathematical model of recombinational amplification of the 2μ plasmid in, 481
SACCHI, O. (see BONIFAZZI, C.), 183
SANFORD, J. C., Applying the PDR principle to AIDS, 469
Saturation functions as a nested set (letter), 125
Scatchard plot, deviation from a hyperbolic binding curve and the appearance of apparent co-operativity in; interaction of protein with a self-associating ligand, 49
SCHMIDT, R. C. (see TURVEY, M. T.), 285
Selection, viability, frequency-dependent, an example of complex dynamical behaviour of, 167
Selection, viability, frequency-dependent (a single-locus, multi-phenotype model), 147
Self-associating ligand, interaction of protein with; deviation from a hyperbolic curve and apparent co-operativity in the Scatchard plot, 49
Self-organized chemical model and reaction cascade, 67
Sensation, peripheral, conscious, on the time of (letter), 253
Sequence-dependency of DNA conformation, ab initio molecular orbital study; evaluation of intra- and inter-strand stacking interaction energy, 327
SHIRANE, K. (see TOKIMOTO, T.), 67
SHIRANE, K. and TOKIMOTO, T., Network formation in negative charged membranes by two divalent cations and the catastrophe, 223
SKALAK, R. (see TÖZEREN, A.), 337
SNYDER, D. M., On the time of a conscious peripheral sensation (letter), 253
SOMORJAI, R. L. (see KLEIN, P.), 461
Space charge effects on the ionic currents through biological membranes, 431
Speciation, sympatric, lottery of; a computer model, 379
Stability of a mixed strategy in a finite population (letter), 247
Stacking interaction energy, intra- and inter-strand, evaluation of; an ab initio molecular orbital study on the sequence-dependency of DNA conformation, 327
Strategy, mixed, can it be stable in a finite population? (letter), 247
Stress and growth interaction in a fibrous tissue, 337
Structures, protein, nonlinear methods for discrimination and their application to classification of, 461
Survivorship curves of fossil taxa, biases in, 31
Symbiotic units, plant-animal, computation of metabolic quotients in, 205
Sympatric speciation, lottery of; a computer model, 379

Taxa, fossil, biases in the per-taxon origination and extinction rates of, 9
Taxa, fossil, biases in the survivorship curves of, 31
Taxa, fossil, biases in the total extinction rates of, 1
TAYLOR, P. D., An inclusive fitness model for dispersal of offspring, 363

Thermodynamic network analysis and simulation of isotonic solute-coupled volume flow in leaky epithelia, 73
Time allometry of co-ordinated rhythmic movements, 285
Time of a conscious peripheral sensation (letter), 253
Tissue, fibrous, interaction of stress and growth in, 337
